

Assignment 4

1. Download the spreadsheet located at http://www.ils.unc.edu/courses/2007_fall/inls890_126/assignments/80s.xls or http://www.ils.unc.edu/courses/2007_fall/inls890_126/assignments/80s.ods.
2. Assuming each row in the spreadsheet (apart from the titles) represents a single XML record, devise an XML format capable of representing each row in the spreadsheet as a single XML file.
3. Pick three representative rows and make XML documents for them.
4. Produce an XML schema (with appropriate datatypes, structures, etc.) against which these documents will validate.
5. Produce a RELAX NG compact syntax schema against which your documents validate.
6. Email the three XML files, the schema, and the .rnc file to hcayless@email.unc.edu
