

INLS 523 Database I

PROJECT Part I: Due on October 15th.

Please submit your answers in electronic format to the TA: pu@email.unc.edu.

OVERVIEW

The project should satisfy the following basic requirements:

- The project system should be implemented using MS Access
- Three forms for data entry
- Three forms for querying/retrieving records
- Four reports
- Anchor/navigation form

Overall you must follow user interface guidelines to ensure that the system is easy to use and information provided is up-to-date and accurate.

DELIVERABLES for PROJECT Part I

The **requirements specification document** should include the following components:

- 1) A two-paragraph description of the **scope** of the project system. The scope should describe:
 - a) Why is the project system needed? User group?
 - b) Is it a new system or a system which replaces an existing system?
 - c) Are there existing data that will become records in the project system?
 - d) How many records do you plan to include (overall total) in the project system?
- 2) Provide a list of the **major categories** of data or clusters of data the project system will store/manage.
- 3) An **E-R data model** of the key entities, attributes, and relationships.
- 4) **Names and email address of project team members.**
