INLS 760-001
Database Systems I
Spring 2013

Section:  
Tuesdays 6:00 – 8:45pm, Manning 208

Instructor:  
Dr. Robert Capra
Office:  
Manning 210
Office Hours:  
Tuesdays, 4:00 – 5:30pm, 
Thursdays, 2:00 – 3:30pm, and by appointment
Email:  
r<lastname> at unc dot edu

Prerequisite(s):  
INLS 572 or equivalent, INLS 523 and programming experience

Textbook:  
PHP and MySQL Web Development, Fourth Edition
Welling, L. and Thomson, L.
ISBN: 0-672-32916-6

Murach’s PHP and MySQL
Murach, J. and Harris, R.
ISBN: 1890774561

Course Webpage:  
http://www.ils.unc.edu/courses/2013_spring/inls760_001/

NOTE: We will also use a Sakai site for this course.

1. Course Description and Prerequisites

From the SILS course description:

INLS 760 (259): Web Databases
Prerequisites: INLS 572 or equivalent, INLS 623 and programming experience.
Explores concepts and practice surrounding the implementation and delivery of Web-enabled databases. Students will gain experience with and evaluate PC and Unix Web database platforms. (3)

2. Course Objectives

- Solidify understanding of web protocols and standards: HTTP, HTML, CSS, CGI.
- Gain practical experience implementing Web databases using and “LAMP” (Linux, Apache, MySQL, and PHP) environment
- Learn techniques for dealing with security, user authentication, web transactions, session management, and keyword search.
- Work with Javascript and DOM client-side technologies in a web database context.
- Introduce the Model-View-Controller architecture and understand how it supports development.
- Learn about emerging Web database technologies and trends.
- Develop the ability to critically assess and review program code for Web databases.

3. Computing Requirements

**Development environment:** You will need a "LAMP" (Linux, Apache, MySQL, and PHP) environment for this course. Although you have access to these through your SILS computer accounts, you are encouraged to install and configure a LAMP environment on your own computer. Do NOT un-install your current operating system – you can run LAMP in a “virtual machine” so that it will not interfere with your existing operating system. The instructor will discuss options for running a LAMP environment on your own computer during the initial class sessions. Projects will be graded using a LAMP environment using Ubuntu Server 12.04.1 LTS.

**In-class computer use:** Most class periods we will do examples and exercises in class that will benefit from each student having a laptop.

4. Graded Work

Your grade will be based on participation, project assignments (mostly programming), a midterm test, and a final exam, weighted as shown on the table listed under “Grade Weighting” on the first page.

**Participation**
Students are expected to regularly attend and participate in class. Throughout the semester, students will be called on in class to answer questions, to present work from assignments, and to participate in in-class exercises. Your participation grade will be based on these factors plus regular class attendance, courteous behavior in class, being prepared for class, and being fully and actively engaged during class.

**Project assignments**
Project assignments are designed to give you “hands-on” experience with the concepts and technologies that are covered in this course. These assignments will require you to use new technologies to implement features important to Web databases. The assignments will often involve a mixture of programming and database work. As is the case with many programming-oriented assignments, these are likely to require a significant amount of implementation and debugging time each week.

For each project assignment, you will be asked if you would like to make the code you wrote open-source so that others can view it after acceptance due date is past. This is not a requirement and will not affect
your grade. There will be a folder on Sakai to upload these open-sourced assignment solutions. There are several goals with this. First, reviewing other students’ code is a good way to learn new programming techniques and to gain skill in understanding the code of others (like reading someone else’s essay in a writing class). Second, some assignments may build on prior ones, so you may benefit from looking at a working implementation of an earlier assignment.

**Exams**
There will be one mid-term and one final exam.

## 5. Grading Policies

The following grade scale will be used **AS A GUIDELINE** (subject to any curve) for **undergraduates**:

<table>
<thead>
<tr>
<th>Grade Range</th>
<th>Definition*</th>
</tr>
</thead>
<tbody>
<tr>
<td>A 90-100%</td>
<td>Mastery of course content at the <strong>highest level of attainment</strong> that can reasonably be expected of students at a given stage of development. The A grade states clearly that the students have shown such <strong>outstanding promise</strong> in the aspect of the discipline under study that he/she may be strongly encouraged to continue.</td>
</tr>
<tr>
<td>B 80-89.9%</td>
<td><strong>Strong performance</strong> demonstrating a high level of attainment for a student at a given stage of development. The B grade states that the student has shown solid promise in the aspect of the discipline under study.</td>
</tr>
<tr>
<td>C 70-79.9%</td>
<td>A <strong>totally acceptable performance</strong> demonstrating an adequate level of attainment for a student at a given stage of development. The C grade states that, while not yet showing unusual promise, the student may continue to study in the discipline with reasonable hope of intellectual development.</td>
</tr>
<tr>
<td>D 60-69.9%</td>
<td>A <strong>marginal performance</strong> in the required exercises demonstrating a minimal passing level of attainment. A student has given no evidence of prospective growth in the discipline; an accumulation of D grades should be taken to mean that the student would be well advised not to continue in the academic field.</td>
</tr>
<tr>
<td>F 0-59.9%</td>
<td>For whatever reason, an <strong>unacceptable performance</strong>. The F grade indicates that the student's performance in the required exercises has revealed almost no understanding of the course content. A grade of F should warrant an advisor's questioning whether the student may suitably register for further study in the discipline before remedial work is undertaken.</td>
</tr>
</tbody>
</table>

* Definitions are from: [http://registrar.unc.edu/academic-services/grades/explanation-of-grading-system/](http://registrar.unc.edu/academic-services/grades/explanation-of-grading-system/) (underlining is my emphasis)

The following grade scale will be used **AS A GUIDELINE** (subject to any curve) for **graduate students**:

<table>
<thead>
<tr>
<th>Grade Range</th>
<th>Definition*</th>
</tr>
</thead>
<tbody>
<tr>
<td>H: 95-99%</td>
<td>High Pass</td>
</tr>
<tr>
<td>P: 80-94.9%</td>
<td>Pass</td>
</tr>
<tr>
<td>L: 70-79.9%</td>
<td>Low Pass</td>
</tr>
<tr>
<td>F: 0-69.9%</td>
<td>Fail</td>
</tr>
</tbody>
</table>

* Definitions are from: [http://registrar.unc.edu/academic-services/grades/explanation-of-grading-system/](http://registrar.unc.edu/academic-services/grades/explanation-of-grading-system/)

These scales will be used as a GUIDELINE ONLY. The final grade scale may differ.
Due Dates and Late Work
Each assignment will have a due date and time and will include instructions for submission. A late penalty of 10% per day will be applied unless prior arrangements have been made with the instructor. Assignments submitted more than 5 days after the due date will receive no credit and will not be graded.

Requests for Extensions and Absences
Any request for an extension must be made, preferably by email, at least 24 hours prior to the due date. Written documentation is required for illness. If a serious illness prevents you from taking any of the tests, send your instructor an e-mail message, or a friend with a note, describing your condition before the scheduled test.

Statute of Limitations
Any questions or complaints regarding the grading of an assignment or test must be raised within one week after the score or graded assignment is made available (not when you pick it up).

6. Course Communication (Website, Listserv, Blackboard)

Course Website
The official course website is at:

http://www.ils.unc.edu/courses/2013_spring/inls760_001/

The website will contain the course syllabus, schedule and other useful information.

Sakai
All enrolled students should have access to the UNC Sakai site for this course:

http://sakai.unc.edu/

We will use Sakai for many of the administrative aspects of the course.

- **Course Announcements**: I will often use the Sakai messaging feature to post announcements to the class. Usually these posts will also be sent via email to each student’s email address of record. However, it is the responsibility of every student to check the Sakai site regularly for announcements and messages. The Sakai site is a reliable source for announcements and messages from the instructor. If something the instructor says in class conflicts with information posted by the instructor on Sakai, then the information posted on by the instructor on Sakai takes precedence. Verbal instructions are easily mis-interpreted, and they do not leave a documentation trail.

- **Assignments**: In order for you to receive credit for an assignment, it must be submitted using the Sakai “Assignments” section. In my experience, Sakai is a reliable method to submit assignments. It is the responsibility of each student to make sure they have access to Sakai and can submit assignments when they are due.
  
  If for some reason you are unable to submit an assignment to Sakai, as a last resort you may email it to the instructor along with a note about the problem you encountered. Then, as soon as you are able to, it is your responsibility to submit the exact same assignment to Sakai. The email serves as a record that you tried to submit the assignment on time, but to receive credit, your assignment must be uploaded to Sakai.

- **Grades**: I will use the Sakai “Gradebook” to record your course grades.
7. Honor Code

The UNC Honor Code is in effect for all work in this course. The “Instrument of Student Judicial Governance” gives examples of actions that constitute academic dishonesty:

http://instrument.unc.edu/instrument.text.html#academicdishonesty

Student often ask what is okay to talk about with other students and what is not. I do encourage you to help each other learn the course material – your fellow students can often be a great resource for learning. However, you should not discuss the details of a solution to an assignment with other students, and should never copy or share answers for an assignment with other students. It is okay to talk about course material with other students, but you should not discuss detailed solutions to pending assignments. All work you submit should be your own. One way to help insure this is that if you do discuss course material with other students, do not take any written notes.

8. Special Accommodations

If any student needs special accommodations, please contact the instructor during the first week of classes.
