Assignment 4

15 points
Due Sunday, March 21, end of day
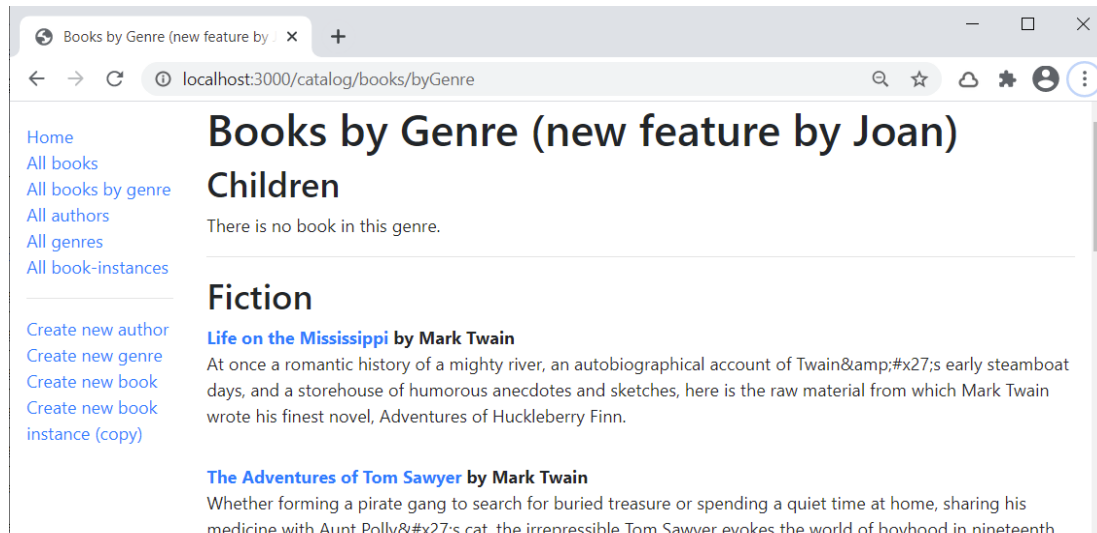

Joan Boone

jpboone@email.unc.edu

UNC
SCHOOL OF INFORMATION
AND LIBRARY SCIENCE

Part 1: Add a new feature (10 points)

Add a new feature to Local Library that lists 'Books by Genre'

- The Local-Library-code-snippets.txt file contains the snippets of code that are needed to add this feature.

- You do not need to write any new code, but you do need to understand the application well enough to know where the code should be added.

- Change the title so that it includes: **(new feature by *your name*)**

- Below is an example of what the updated sidebar and new page would look like:

Include in your email a screenshot of your page – do NOT send any code.

Part 2: A few questions (5 points)

Answer the following:

- For the new feature, 'All books by genre', why are there no model changes required?

- Why is a new controller function needed for this query?

- What validation criteria are required when creating a new book?

- On the last slide for Node.js Application, note that the URL changes from `localhost:3000` to `localhost:3000/catalog`. Where does this URL change occur and why?

Include your answers and the screenshot from Part 1 in your email, and send to jpboone@email.unc.edu
