Safety Deposit Box
Tessella’s Long Term Role in Archiving Research
Build versus Buy
SDB in the Cloud (POC)

2013
Safety Deposit Box (platform) and Preservica
Report Card
Demonstration
Safety Deposit Box-in its fourth generation (4.3)

Provides the services you need to ingest, identify, characterize, extract metadata, basic safety checks (format validation, virus), store, preserve, analyze collection for risks…….

- Service Oriented Architecture / Workflow Driven. Modular approach (set of cohesive services)
- Active Preservation---Ensures your records, content etc are trusted and useable long into the future
- Authentication today, without customization
- Comprehensive digital preservation platform
- Information model perspective – SIP, AIP, DIP, representation info
Practical Experience

• Development of tools - DROID / PRONOM / DIOSCURI

• Active in collaborative research in EU and North America

• Recognized by the community (DPC Awards 2004 / 2007)
