

SERVICES OVERVIEW

DuraCloud and DSpaceDirect

Carissa Smith

Happy New Year!

⦿ Resolution #1

- I'm going to better preserve, archive, and do more with my digital content.

⦿ But...

- I have limited access to hardware, resources, time, staff, budget, etc.

DuraCloud

- Managed cloud-based service running open source software
- On-demand storage and services for preserving and archiving content across multiple cloud storage providers
- Offsite storage/backup, multiple storage provider options, unlimited storage space, data integrity features (health checking)

Standard Features

- Connections to multiple cloud storage providers through ONE unified web-based user interface
- REST API
- Automated duplication and synchronization of content between providers
- Bit integrity checking of content in storage
- Tools to get content into and out of storage
- Video and audio streaming
- Online access to all content
- Access controls and user permissions
- Drag and drop content upload through the web UI

Why DuraCloud?

- One web interface to all content
- Automated transparent health checking
- Storage reports
- Media streaming
- Automatic synchronization among all cloud storage providers
- Consolidated accounts, management, billing
- Customer support through DuraSpace
- Range of subscription plans available

Happy New Year!

⦿ Resolution #2

- I'm going to better manage, organize, and provide access to my digital collections.

⦿ But...

- I have limited resources, time, budget, staff, skills, etc.

DSpaceDirect

- Hosted turnkey repository service running DSpace open source software
- Store, organize, and manage any content in a cloud-based DSpace instance

D SPACE DIRECT

Standard Features

- Hosted DSpace installation of latest release
- Managed system administration
- Annual upgrades
- Unique, persistent IDs via Handle System
- Search engine optimization for Google, Google Scholar, etc. (includes sitemap creation)
- Basic site branding
- User, group, permissions management through DSpaceDirect admin console
- Basic usage statistics and reporting

More Standard Features

- Integration with Google Analytics (optional)
- Access to customer support ticket system including 10 free support requests in first 90 days
- Upgrade your subscription at any time
- Customizable approval workflow
- Customizable deposit license for content submissions
- Batch edit metadata
- Open source
- Migrate to locally hosted DSpace at any time
- Additional optional features available (just ask!)

Happy New Year!

- ⦿ Resolution #3

- I'm going to do it all!

- ⦿ But...

- I don't even know where to begin.

Some Useful Integrations

- ◉ Fedora → DuraCloud or
- ◉ DSpace → DuraCloud or
- ◉ DSpaceDirect → DuraCloud

=

- ◉ Archiving, Discovery, Access, and Preservation

Happy New Year!

- ◎ Uh oh!

- All of my resolutions have fallen through.

- ◎ Drat...

- What do I do now?

DuraSpace Service Policy

- DuraCloud exit strategy
 - DuraCloud can easily move your content between any of the integrated storage providers
 - No special content packaging required
- DSpaceDirect exit strategy
 - Running latest DSpace open source code
 - Can migrate to local version easily
- Bottom line
 - Open source = freedom to host locally
